Hunter Pacific International Warehouses
New South Wales, Victoria and Queensland

Things you should consider:

- All electrical work must be done by licensed electricians and fans, lights and remote control receivers must be located where they can be accessed for maintenance and fitted with an isolation switch.
- Outdoor locations must be protected from wind on all sides except one. Wind and air currents will cause fan to wobble.
- Most electrical systems have noise present and this can sometimes be heard in a ceiling fan. Ripple control signals and dimmer noise may sound like buzzing in the fan and is not caused by a defect in the fan. Noise filters may help reduce such noise.
- Decorative finishes will wear with heavy use and not regularly cleaning steel fan parts will lead to corrosion.
- Different rooms will cause different performance and fans will vary in speed a small amount.
- Modifications to the products (other than changing down rods) may void all or the warranty.
- Not installing the product according to directions may affect performance or limit warranty coverage.

Warranty

2 years In-home Warranty on all Hunter Pacific International AC and DC ceiling fans, including fans with fully integrated light combinations and DC remote controls & receivers. This warranty excludes cosmetic and corrosion damage (unless reported in the first three months).

3 year additional Parts Only Warranty on the electric motor.

All non-integrated Hunter Pacific International light kits and AC remote control systems are separately purchased accessories for AC ceiling fans and as such are covered by our accessory parts warranty for 12 months from date of purchase.
